PLANNING DEPT.

To Whom It May Concern,

I am writing this letter in support of MD - 9 to be included as part of the new Urban Growth Boundry Amendment. I am a local Realtor and have been born and raised in Medford. I have seen a lot of changes in this valley. One of the things that concerns me the most about the direction of our valley is the lack of affordable housing. It seems like all of the housing on the East side is for higher income families. We need more affordable housing and MD -9 seems like a logical option.

As I have looked through some of the obstacles to some of the properties being considered it is obvious to me that MD - 9 meets all of the criteria that the City of Medford is looking for. MD - 9 is a large parcel of over 100 acres with numerous owners that are in agreement on having a developement that allows for open space and mixed uses. A lot of the infastructure is in place and it is easier to develop flat ground. This parcel is also very close to several shopping districts. It is not like some of the other parcels that are trying to gain inclusion from owner/builders that are more concerned with their bottom line than the need for affordable housing for our community. The parcel also meets a lot of the public works requirements with scores of 5. This will enable a lower cost to developing the lots, which will help keep homes affordable.

I feel the main goal of the City of Medford in this process is to keep homes affordable in our valley. I feel that this can be accomplished with the inclusion of MD - 9.

Sincerely,

Christopher Knox
